

Masum Reza

Software Developer(React.js)

I possess one year of practical experience in frontend development, specializing in React.js. Proficient in crafting responsive user interfaces, implementing state management, and collaborating with cross-functional teams. Demonstrated ability to transform design concepts into interactive and visually appealing web applications.

WORK EXPERIENCE

Associate Software Developer

Antino Labs Pvt Ltd

02/2023 - Present

Gurgaon

Achievements/Tasks

- Developed a strong command over React.js, leveraging its component-based architecture and virtual DOM to create dynamic and responsive user interfaces.
- Successfully designed, implemented, and maintained various reusable UI components, enhancing code modularity and scalability across projects.
- Gained expertise in state management using tools like Redux or Context API, efficiently managing application-wide states and ensuring data consistency.
- Effectively integrated RESTful APIs and utilized asynchronous programming techniques to fetch and display data, enhancing the interactive nature of the applications.
- Developed responsive web applications by utilizing media queries and Flexbox/Grid layouts, ensuring a consistent and user-friendly experience across devices.
- Utilized Git and platforms like GitHub for collaborative development, maintaining version control and enabling seamless teamwork within the development lifecycle.

Software Developer Intern

Kiswok industries pvt ltd

11/2021 - 02/2022

Kolkata

Achievements/Tasks

- Developed a solid foundation in HTML, effectively structuring web content with semantic elements. Created interactive forms, embedded multimedia, and gained expertise in organizing information hierarchically.
- Gained hands-on experience with JavaScript programming. Grasped core concepts like variables, data types, and control structures. Developed interactive features like form validation, toggles, and simple animations to enhance user experience.
- Participated in small projects to apply acquired skills. Built basic web pages from scratch, incorporating HTML, CSS, and JavaScript. Collaborated on enhancing user interfaces, optimizing page performance, and debugging code for smoother functionality.

EDUCATION

B.Tech in Computer Science & Engineering

Brainware University

07/2020 - 07/2023

Kolkata

Courses

- CGPA - 7.8

Diploma in CST

Nibedita Institute of Technology

07/2017 - 07/2020

Murshidabad

SKILLS

React.js

Redux

Redux Toolkit

Webpack

React Query

Next.js

HTML5

CSS3

SCSS

Material UI

TailwindCSS

JavaScript (ES6+)

Git

GitHub

Jira

Rest Api integration

Linux

DSA

TypeScript

PROJECTS

SomeOne Like Me (07/2023 - Present)

- Technologies Used: ReactJS, Redux Toolkit, Material UI, Tailwind CSS, HTML5, and CSS3.
- "SomeOne Like Me" is an innovative online dating application, similar to Tinder, designed to connect individuals with shared interests and preferences. As a Frontend Developer, I played a pivotal role in the development of the entire project, with a particular focus on creating the intuitive and efficient Admin Portal.

Devlabs (05/2023 - 07/2023)

- Technologies: ReactJS, NextJS, Redux, Redux Toolkit, Material UI, Tailwind CSS, HTML5, and CSS3.
- DevLabs is an online course selling platform that helps students learn new technologies. I contributed to the development of various schemas in the Amberstudent blog, including article, breadcrumbs, FAQ, video, etc., which significantly improved SEO rankings. To optimize loading time, I used custom CSS and Tailwind CSS for animations, transitions, and grid layouts while adhering to design guidelines throughout the development of all pages.

Antino RMS (03/2023 - 04/2023)

- Description: Antino RMS is an internal project of Antino. As a frontend developer, I utilized React Redux Toolkit, RESTful API, Redux, and MUI for the layout and CSS for styling. The app allows users to fill up their details, including contact information, educational background, skills, and experience, and preview the data in real-time.

Sneaker (05/2022 - 08/2022)

- Designed and developed the frontend for an e-commerce project using React.js. Implemented responsive product listings, dynamic filtering, and a user-friendly shopping cart interface, enhancing the online shopping experience.
- Integrated intuitive navigation, interactive product previews, and streamlined checkout processes. Collaborated with designers to ensure pixel-perfect UI implementation, resulting in an engaging and visually appealing online store.
